

From: "Rep. Trey Hollingsworth" <trey@mail.house.gov> To: Carter.Moelk@mail.house.gov Subject: Poll: Energy Independence Date: Wed, 09 Mar 2022 13:06:02 -0500 Dear Hoosiers, The average price for a gallon of gas hit a record high of \$4.17 this Tuesday. Hoosiers and Americans across the country are feeling this devastating result of inflation caused, largely, by liberals' excessive spending in Washington, and they are seeing the fallout of poor energy policy from the White House. Since taking office, President Biden's policies, such as shutting down the construction of the Keystone XL pipeline and pausing on and offshore drilling leases, have hindered American energy independence. The rise in gas prices will only be exacerbated by the necessary step of cutting off imports of Russian energy products to punish Russia for its invasion of Ukraine. The importance of establishing U.S. energy independence has never been more prominent. QUESTION OF THE WEEK: What do you think should be the government's primary focus for energy independence? ☐ Increasing domestic oil/gas production ☐ Expanding electric car technologies ☐ Investing in clean energy (wind, solar, hydro, geothermal energy) ☐ Boosting the ethanol fuel supply ☐ Developing nuclear energy ☐ I don't know ☐ Other Dear Hoosiers, The average price for a gallon of gas hit a record high of \$4.17 this Tuesday.
