I'm proud to cosponsor the No American Land for Communist China Act- introduced

purchasing land adjacent to federally owned land. This important legislation

resources from being purchased by communist China. And last year, I joined Rep.

Newhouse in introducing the Prohibition of Agricultural Land for the People's

Republic of China Act to prohibit the purchase of public or private farmland in

the U.S. by foreign nationals associated with the Government of the People's

Republic of China. There is no reason why communist China should be gaining a

foothold in the United States. These are both commonsense legislative solutions

to ensure we keep communist China from purchasing valuable American land,

undercutting our farmers, and jeopardizing our national security. Receiving

ban

America must lead in energy production and exportation to secure North American

energy independence and compete globally. The Biden administration's policy to

ban the export of liquefied natural gas (LNG) will hurt our economy and cut

jobs. Not to mention, this move will force our allies and other nations to

depend on foreign adversaries for their energy. That's why I voted in favor of a

bill(<https://latta.house.gov/news/documentsingle.aspx?DocumentID=404289>) in

Congress to immediately reverse this ban. I spoke to Spectrum News about the
