

**to add solar panels at Medford's Carr Park!**

■ ■ ■ ■ ■ Jon, Recent extreme weather has laid bare the urgency of Massachusetts' fight against the climate crisis and highlighted the inequities facing many in our community. As as we continue advancing the movement for environmental justice, we're going to need every resource we can muster. I have good news: I secured nearly \$11 million in the 2023 federal budget to bolster this fight across the Fifth District, including \$1.5 million to add solar panels at Medford's Carr Park. I want to hear from you: SHOULD CONGRESS INVEST IN LOCAL GREEN TECHNOLOGY? These funds will help implement an innovative and resilient community solar array over Carr Park's basketball court to power electric vehicle charging stations, new LED lighting, phone and laptop charging ports in the pavilion, and the playground's water features. I am thrilled to bring these funds back home to Medford because, as Mayor Breanna Lungo-Koehn told me, "this funding will help us transform Carr Park to a more accessible, sustainable and resilient green space for families and residents." Sincerely, Congresswoman Katherine Clark Democratic Whip \*It is my job to listen to Massachusetts families — please take my survey to let me know your views and opt-in to email updates.
